USPAT2 is a companion file to USPATFULL. USPAT2 contains full text  
of the latest US publications, starting in 2001, for the inventions  
covered in USPATFULL. USPATFULL contains full text of the original  
published US patents from 1971 to date and the original applications  
from 2001. In addition, a USPATFULL record for an invention contains  
a complete list of publications that may be searched in standard  
search fields, e.g., /PN, /PK, etc.

USPATFULL and USPAT2 can be accessed and searched together through  
the new cluster USPATALL. Type FILE USPATALL to enter this cluster.

Use USPATALL when searching terms such as patent assignees,  
classifications, or claims, that may potentially change from the  
earliest to the latest publication.
